1. Claims 1-35 are presented for examination. However, restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-22, drawn to "a network device having at least one master connected to at least one high speed docking station for processing and handling data" in combination with other claimed structure, classified in Class 710, subclass 303.

II. Claims 23-35, drawn to "a method of handling data including forwarding the data to a high speed docking station, packing the data and passing the packed data to a master for processing" in combination with other claimed steps of the method, classified in Class 709, subclass 200.

Inventions I and II are related as apparatus and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed in claims 23-35 can be used in another materially different apparatus such as "a packet communication system", classified in Class 370 subclass 912.

2. Because inventions I and II are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction of claims (1-22) and (23-35) for examination purposes is proper.

3. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

4. Applicant should cancel the claims of non-elected inventions. However, applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or

more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gopal C. Ray whose telephone number is (703) 305-9647. The examiner can normally be reached on Monday - Friday from 8:00 AM - 4:30 PM.

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to TC2100 receptionist whose telephone number is (703) 305-3900.
